INV ASSOCIATED PRESS. 1

LONDON, Aug. 27.—All night long the volunteer rescuing parties Lept up to their work at the Parkslip pit, the scene of the explosion at Bridgend, Wates, yesterday. At 6 o'clock this morning they had penetrated 900 yards into the main shalt.

White a band were working their way further into the pit a sound was heard that

caused them to sudgenly suspend operations The noise was repeated. It could not be mistaken. With a bearty cheer they again bent to facir task with renewed energy. Creeping and sometimes lying flat on their stomacha they advanced, while those behind kept the tunnel clear. At last the separating bank of rock and earth fell inward, and the rescuers entered an open space, in which were huddled together nineteen of the miners

who had teen imprisoned since yesterday moraing. Most of the imprisoned men had been badly injured and burned so seriously that special arrangements will have to be made to get

them from the pit.

The anxiety among the throng about the pit mouth is pitiful to witness. As soon as it is possible the officials will learn the names of the rescued men, and thus relieve the strain which their relatives are undergoing.

The after damp is so bad that the work of rescue is ofter retarded, the volunteers being driven out of the excavations until the pit improves.

Ten bodies were recovered of men who did not have a second's warning or the inte hanging over them. Two other bodies were so terribly mutilized that identification.
